

BAVARIA®

Fire Fighting Solutions

How to extinguish properly.

Check the direction of the wind. Do not extinguish the flames directly, but the burning object from a suitable distance.

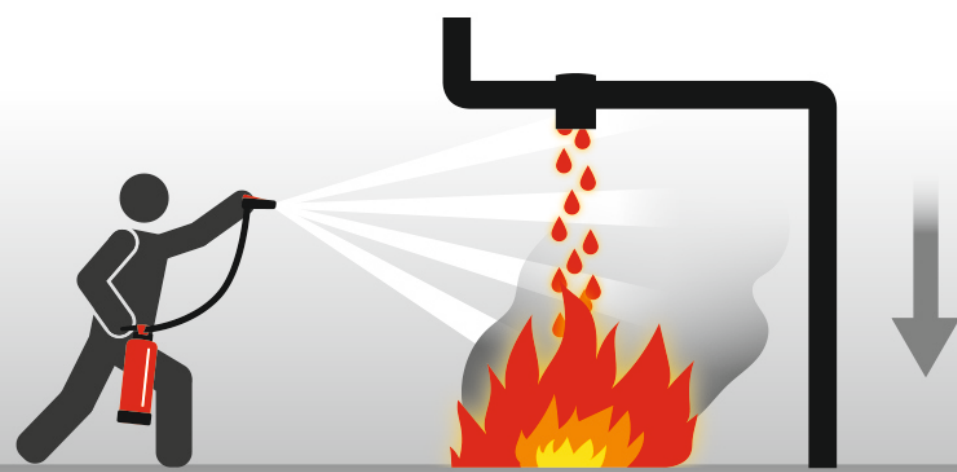

Extinguish the spreaded fires from the front to the back.

Extinguish intermittently. Use only as much agent as it is required to extinguish the fire. Save enough extinguishing agent in case of a possible re-ignition.

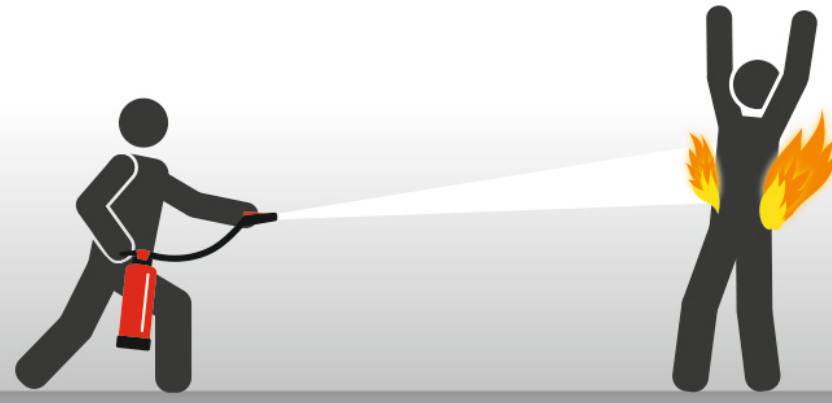

Extinguish dripping or streaming fire from the top to the bottom.

If it is possible use more extinguishers simultaneously, instead of one after another.

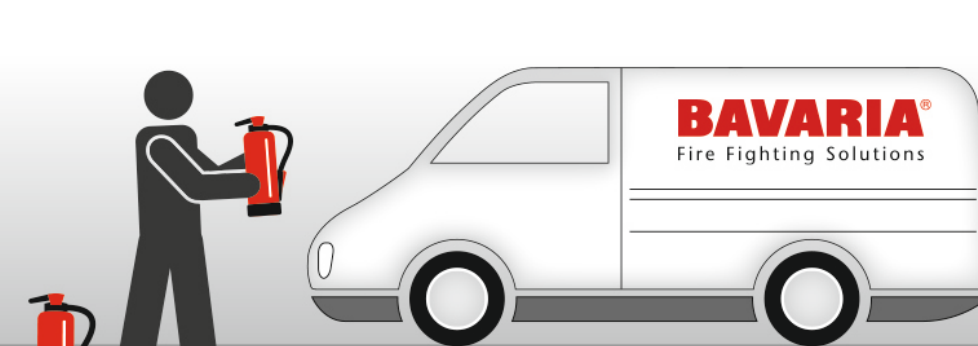

Extinguish a burning person also with the fire extinguisher.

Please do not leave the extinguished fire immediately. Check for possible reignition.

Please let the used fire extinguisher maintained and refill.

How to behave in case of fire

- Keep calm.
- Alert present person
- Call the fire fighters and use the nearest fire alarm.

Questions from the central office:

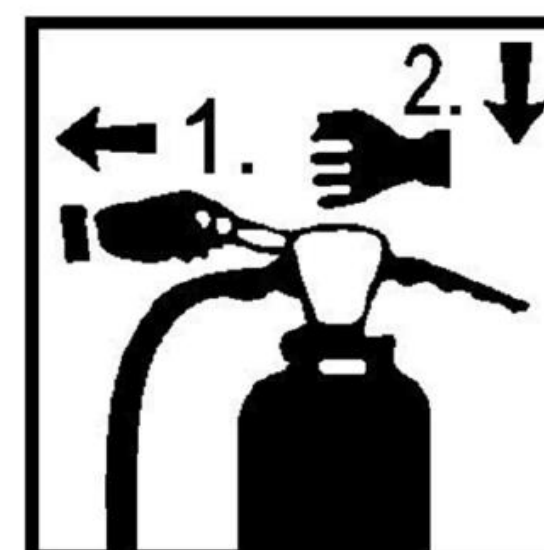

- **Whom** is it happened?
- **What** has happened?
- **Who** is calling?
- **How** many person are injured?
- **Wait** for any questions from the central office!
- **Important!** The central office end the call.

- Extinguish the fire only if you are not bringing yourself in any danger.

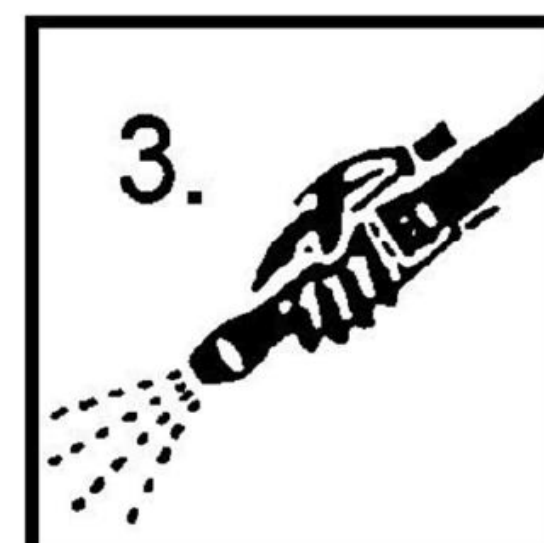

- In case of any danger, during the extinguishing: please flee!

- Bring yourself and any person in danger into safety.

Prepare the extinguisher for the usage

1. Remove the sealing
2. Push the activation button

3. Use the extinguishing gun
