

FIFTY YEARS OF "SAFETY"

"Bavaria Egypt" Celebrates "the Golden Jubilee"

"Bavaria Egypt" celebrates its Golden Jubilee to its foundation in 1971. Throughout those years, it presented such a success story which all company workers take pride in, and attained such accomplishments which each Egyptian would be proud of, seeing an Egyptian company occupying an international position in the industry of pressure receptacles and extinguishers.

Doctor Engineer Nader Riad, chairman and managing director of the Company, sent a message of thanking and gratitude to the company clients, in appreciation to their support throughout the years of mutual and fruitful cooperation.

He said that the celebration of the Company Golden Jubilee this year is considered a historic moment and an exceptional occasion to express gratitude to all success partners who accompanied and joined the company from the very beginning, which constituted a strong push in the way of excellence and developing the pioneering

Eng. Nader Riad and unique performance levels in providing high-quality services, along with the successes achieved throughout the past fifty years.

"Bavaria Egypt" is an Egyptian success story that established its high quality on the German land, where Germans loved it and gave it their trust after development and upgrade extended to it through the Egyptian will and determination throughout consecutive eras, which made "Bavaria Egypt" such a powerful protection for the various foundations in the face of fire risks and for many successive generations. It has become the most enormous group in the Middle East, afterwards, it could successfully extend its activities in the field of Automatic Alarm Notification Systems in various European markets.

In line with its strategies to provide integrated solutions to the Alarm Systems and Automatic Extinguishing Systems, "Bavaria Egypt" aimed at providing integrated solutions to alarm and automatic extinguishing systems through upgrading its production lines, developing the warehouses systems to work in an integrated automated system, and caring about the aspect of training and improvement as it established the maintenance and training center in Nurmberg, Germany. In addition, Bavaria provided automatic extinguishing systems to protect facilities and vehicles and inaugurated more than 29 branches covering all governorates of Egypt. Moreover, "Bavaria Egypt" launched such a great fleet of moving service centers to serve more than 55 thousand customers in the various governorates annually. Bavaria also established a new company in partnership with "Ziegler" Germany to produce fire trucks in Egypt to be made by Egyptian hands, and worked on transferring such kind of technology to Egypt.
